PROFESSIONAL SUMMARY

Final-year B.Tech student in Computer Science & Artificial Intelligence with demonstrated expertise in machine learning, full-stack development, and mobile application development. Experienced with Python, Java, React, SQL, and cloud technologies. Passionate about building scalable solutions and solving complex problems through AI and software engineering.

TECHNICAL SKILLS & EXPERTISE

Languages & Frameworks Java, Python, C++, C, SQL, JavaScript, TypeScript, HTML5, CSS3, Streamlit, Flask, NumPy, Pandas, Scikit-Learn, Matplotlib, TensorFlow

Development & Tools Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Render, Netlify, Linux, Command Line, API Development, Responsive Design

Machine Learning & Data Science Classification, Regression, NLP, TF-IDF, Cosine Similarity, Naive Bayes, Logistic Regression, Feature Engineering, Data Preprocessing, Model Evaluation

Core Competencies Object-Oriented Programming (OOPs), Data Structures & Algorithms (DSA), Problem Solving.

TECHNICAL PROJECTS

Aqua Tracker Mobile Application | Personal Project | Jan 2024 – Present

Engineered a comprehensive water intake tracking application enabling users to monitor daily hydration with automated reminders and intelligent insights. Implemented responsive UI using React and TypeScript with Tailwind CSS; developed native Android integration using Capacitor achieving seamless hardware button handling. Integrated local data persistence using SQLite; built activity-based recommendations to increase user engagement by 40%. Deployed to 50+ beta testers with 92% retention rate.

AI-Powered Movie Recommendation System | Machine Learning Project | Aug 2024 – Nov 2024

Developed intelligent movie recommendation engine using advanced NLP and content-based filtering techniques on TMDB dataset (10,000+ movies). Implemented hybrid approach combining TF-IDF vectorization, cosine similarity computation, and IMDb weighted rating formulas to improve recommendation accuracy by 35% and reduce bias. Optimized algorithm performance reducing computation time by 28%; evaluated recommendations across 500+ test cases achieving 88% user satisfaction score.

Spam Email Detection Using Machine Learning | Data Science Project | May 2024 – Jul 2024

Built multi-model spam detection system using Python with 5,572 SMS samples achieving 96% accuracy. Implemented comprehensive preprocessing pipeline with NLTK including tokenization, lemmatization, and stop-word removal. Trained and evaluated Multinomial Naive Bayes and Logistic Regression models; generated confusion matrices and precision-recall metrics for robust performance evaluation. Created custom prediction function supporting real-time classification.

EDUCATION

Bachelor of Technology in Computer Science & Artificial Intelligence

Madanapalle Institute of Technology & Science (MITS), Andhra Pradesh, India | CGPA: 8.25/10 | Expected Graduation: May 2027

Diploma in Computer Science (CME)

Government Polytechnic, Proddutur, Andhra Pradesh, India | Percentage: 87.25% | Completed: 2024

Secondary School Certificate (SSC)

Loyola English Medium High School, Dharmavaram, Andhra Pradesh, India | CGPA: 9.3/10

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Machine Learning Intern | Edunet Foundation

May 2025 – July 2025

Completed intensive 4-week AI-focused internship specializing in foundational machine learning and Azure Cloud technologies. Applied supervised and unsupervised machine learning algorithms including classification and regression through 15+ hands-on lab exercises on real-world datasets. Demonstrated proficiency in model training, evaluation, and hyperparameter tuning across multiple project scenarios.

Generative AI Intern | Saredufy Web Plus Academy Private Limited

June 2025 – August 2025

Architected and deployed "Birthday Message Generator" web application leveraging generative AI to create personalized messages based on user inputs (name, relationship, theme). Built interactive frontend using HTML5, CSS3, and React; implemented backend logic with Python Streamlit framework. Achieved 95% accuracy in message generation; successfully deployed to production with 200+ active users and 4.8/5 user satisfaction rating.

Web Developer Intern | ApexPlanet Software Pvt Ltd

May 2025 – July 2025

Contributed to 8+ real-world web development projects, building responsive and interactive websites using HTML5, CSS3, and JavaScript. Collaborated with senior developers in agile team environment delivering features on tight deadlines. Enhanced front-end development skills through hands-on problem-solving; implemented 12+ responsive components with cross-browser compatibility. Received positive feedback for code quality and attention to detail.

PROFESSIONAL CERTIFICATIONS & ACHIEVEMENTS

AWS Academy Graduate – Cloud Foundations

Completed structured AWS Academy training covering core cloud concepts, AWS services, security best practices, pricing models, and architecture patterns through 20+ hands-on labs. (Completed: 2024)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Demonstrated advanced proficiency in AI fundamentals, machine learning concepts, and OCI services. (Completed: 2025)

HackerRank Certified – Java and SQL

Earned Certificate of Accomplishment demonstrating proficiency in core Java concepts, SQL query optimization, and advanced problem-solving across 50+ coding challenges. (Completed: 2024)

Artificial Intelligence Fundamentals | IBM

Completed comprehensive course on AI principles, neural networks, and machine learning applications. (Completed: 2024)

Introduction to Programming Using Python | Sololearn

Completed Python fundamentals course covering syntax, data structures, and programming best practices. (Completed: 2023)
