PROFESSIONAL SUMMARY

Computer Science and Artificial Intelligence undergraduate (CGPA 8.25) with hands-on experience across three internships spanning machine learning, generative AI, and web development. Proficient in Python, Java and SQL, with practical exposure to classification, regression, NLP, and cloud fundamentals (AWS, Azure, OCI). Built and deployed multiple end-to-end applications; seeking a Software Engineering or AI/ML role to apply strong programming and problem-solving skills.

TECHNICAL SKILLS

Languages: C, Java, Python, SQL, HTML, CSS

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-Learn, Streamlit, Flask

Tools & Platforms: Google Colab, VS Code, Jupyter Notebook, Git, GitHub, Render, Netlify

Databases: MySQL

Core Concepts: Machine Learning (Classification, Regression), Object-Oriented Programming, Data Structures, REST APIs, NLP

INTERNSHIP EXPERIENCE

Machine Learning Intern | Edunet Foundation

May 2025 - Jul 2025

- Implemented 8+ supervised and unsupervised ML models on 5 real-world datasets, improving prediction accuracy by up to 18% through feature engineering and hyperparameter tuning.
- Processed 15,000+ data records using NumPy and Pandas, reducing preprocessing time by 40% and improving model performance.

Generative AI Intern | Saredufy Web Plus Academy Pvt Ltd

Jun 2025 - Aug 2025

- Developed and deployed an AI-powered Birthday Message Generator supporting 10+ message themes with real-time response generation in under 2 seconds.
- Designed the application logic and user interface to deliver dynamic, context-aware text generation in real time.

Web Developer Intern | ApexPlanet Software Pvt Ltd

May 2025 - Jul 2025

- Developed 5+ responsive webpages achieving 100% mobile compatibility and reducing page load time by 30%.
- Collaborated within a team environment to translate design requirements into functional front-end components.

PROJECTS

Aqua Tracker App | Personal Project

- Designed and developed an Android water-intake tracker with hourly reminders, daily/weekly analytics, and support for 3.2L personalized hydration goals.

Movie Recommendation System | Edunet Foundation

- Developed a movie recommendation system using the TMDB dataset (1M+ records) with TF-IDF and Cosine Similarity, generating the Top-10 personalized recommendations in under 1 second.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence

2023 - 2027

Madanapalle Institute of Technology & Science, Angallu | CGPA: 8.25 (through 6th Semester)

Diploma in Computer Engineering (CME)

2021 - 2024

Government Polytechnic, Proddutur | Percentage: 87.25%

Secondary School Certificate (SSC)

2017 - 2021

Layola English Medium High School, Dharmavaram | CGPA: 9.3

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Introduction to Programming Using Python - Sololearn
- Java and SQL - HackerRank (Certificate of Accomplishment)
- Artificial Intelligence Fundamentals - IBM
