INTERNSHIPS

Machine Learning Intern, Edunet Foundation • Worked independently on a data-driven project titled "Movie Recommendation System", implementing supervised machine learning techniques to build personalized recommendation models based on user preferences and behavior. • Completed a 4-week AI-focused internship with Edunet Foundation in collaboration with Microsoft, gaining foundational knowledge in Artificial Intelligence, Machine Learning, and Azure Cloud technologies. • Applied supervised and unsupervised machine learning algorithms, including classification and regression techniques, through hands-on labs and real-world datasets. • Acquired practical experience in Deep Learning, Computer Vision, and Generative AI using Azure tools, along with exposure to industry-relevant workflows and model evaluation techniques.	05/2025 – 07/2025
Generative AI Intern, Saredufy Web Plus Academy Private Limited • Completed a Generative AI internship at Saredufy Web Plus Academy Pvt. Ltd., working on real-time projects and improving practical AI skills. • Developed a "Birthday Message Generator" web application to create personalized messages based on user input like name, relationship, and theme. • Used technologies like HTML, CSS, React, and Python (Streamlit) to build an interactive and user-friendly application. • Implemented features such as message customization, live preview, saving messages, and downloading output as an image.	06/2025 – 08/2025

EDUCATION

Secondary Education Andhra Pradesh, Layola English Medium High School • CGPA : 9.3	2017 – 2021 Dharmavaram
Diploma In CME, Government Polytechnic ,Proddutur • Percentage: 87.25%	2021 – 2024 Proddutur
B.Tech in Computer Science And Artificial Intelligence, Madanapalle Institute of Technology & Science • CGPA: 8.25	2023 – 2027 Angallu

SKILLS AND EXPERTISE

Languages & Libraries Python, Flask, SQL, Numpy, Pandas, Matplotlib, Scikit-Learn, Seaborn	Database & Techs MySQL, HTML, CSS
Tools Google Colab, VS Code, Jupyter NoteBook, Git, Github, Render, Netlify	Concepts Classification, Regression, Clustering, OOP, Data Structures, File Handling, APIs,

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations - Training Badge

Completed structured training under the AWS Academy Cloud Foundations program, covering core cloud concepts, AWS services, security, pricing, and architecture through hands-on labs.

Introduction to Programming Using Python From Sololearn

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Certificate of Accomplishment

Earned a Certificate of Accomplishment in Java and SQL from HackerRank, demonstrating proficiency in core Java concepts, problem-solving, and coding skills.

Artificial Intelligence Fundamentals from IBM

PROJECTS

Water Intake App

- Developed a Water Intake Tracking App to help users monitor daily water consumption and maintain healthy hydration habits.
- Designed a user-friendly interface with features like daily goal setting, real-time tracking, and progress visualization.
- Implemented functionalities such as reminders, data storage, and activity tracking to improve user engagement and consistency.

Movie Recommendation System

- Developed an AI-powered Movie Recommendation System using the TMDB dataset, applying NLP techniques to suggest movies based on content similarity.
- Implemented a hybrid approach combining TF-IDF, cosine similarity, and IMDb weighted rating to improve recommendation accuracy and reduce bias.
- Built interactive dashboards and data visualizations to enable real-time movie discovery, genre analysis, and detailed metadata exploration.

Birthday Message Generator

- Built an interactive Birthday Message Creator web app to generate personalized messages with different themes and customization options.
- Used Streamlit, React, and Tailwind CSS to create a responsive and user-friendly interface with real-time preview and dynamic message generation.
- Implemented features like saving messages, copying text, and downloading birthday cards as images for easy sharing.
